

Nano Minerals

# Silica Liquid Concentrate

Silica is an essential mineral involved in collagen formation and Calcium management.\*

2oz. / 60 ml

**Dr. Dale's Silica:** Today most diets are severely lacking in silica because of the extensive refinement of grains. Silica has been shown to promote lustrous hair, supple skin and strong nails. Silica is essential for the proper utilization of calcium and for maintaining healthy connective tissue - a key component of cardiovascular, gastrointestinal, joint and bone health.

**Take the guesswork out of supplements:** Dr. Dale's uses a proprietary process that transforms pure mineral crystals into a fully hydrated, 100% bioavailable liquid ionic supplement  
• taste free • gentle on the stomach • made in the USA and quality tested to assure safety and potency  
• No additives or sweeteners.

**The Dr. Dale's difference:** Large doses are used in solid supplements because most of the mineral is not absorbed. Dr. Dale's minerals are 100% bioavailable. It is not necessary to take large doses in order to be effective.
